Professional Summary

Cyber Security undergraduate and aspiring Penetration Tester with hands-on experience in Django full-stack development and cybersecurity fundamentals. Skilled in Python, web technologies, and security tools such as Kali Linux, Burp Suite, and Nmap. Experienced in building real-world projects including AI-based malware detection systems and full Django applications. Passionate about ethical hacking, vulnerability analysis, and secure system design.

Education

B.Tech in Computer Science (Cyber Security)

Jawaharlal College of Engineering and Technology, Palakkad

Currently in 2nd Year

Higher Secondary – Computer Science

Assisi E.M.H.S.S, Kanjikode

Percentage: 80%

2022 – 2024

Matriculation

Assisi E.M.H.S.S, Kanjikode

Percentage: 90%

2022

Technical Skills

Programming Languages: Python, C, C++, JavaScript (Basic)

Web Technologies: HTML, CSS, Django

Cybersecurity Tools: Kali Linux, Burp Suite, Nmap

Other Skills: Git, GitHub, Linux Basics, Secure Coding Fundamentals

Projects

AI Malware Detection & Chatbot Web Application

- Developed an AI-based system to detect malicious files and URLs
- Integrated a chatbot to assist users with malware and cybersecurity queries
- Built using Python, Django, and web technologies

PSC Genie – Full Django Project

- Designed and developed a complete Django-based web application for PSC exam preparation
- Implemented backend logic, database management, and UI components
- Focused on clean architecture and scalability

Internships and Training

Cybersecurity Research Internship

Jun 2025

eHackify Cybersecurity Research & Training

- Completed a short-term internship as a Cybersecurity Researcher
- Gained practical exposure to vulnerability analysis and ethical hacking concepts

Python & Django Development Internship

Nov 2025

Ryphira Private Limited

- Successfully completed a 14-day internship in Python and Django development
- Worked on backend development and web application design

Certifications and Workshops

Agentic AI for Threat Detection and Defense

Mar 2025

Infomates

- Attended a technical webinar on AI-driven cyber threat detection

Amazon Web Services (AWS) Workshop

Oct 2024

National Institute of Technology Calicut

- Participated in AWS workshop conducted during TATHVA'24
- Learned fundamentals of cloud computing and AWS services

Activities and Engagement

- Actively engaged in cybersecurity learning through internships, workshops, and projects
- Practiced ethical hacking and security concepts using Kali Linux tools
- Regularly build and maintain projects on GitHub to improve coding and security skills
